VICTORIA DIAMONDS

OUR QUALITY GUARANTEE

5-Point Inspection Process

Meticulous. Multi-step. Masterfully done.

Every Victoria Diamonds piece goes through live meticulous checkpoints by our master gemologists — to deliver nothing less than perfection.

1

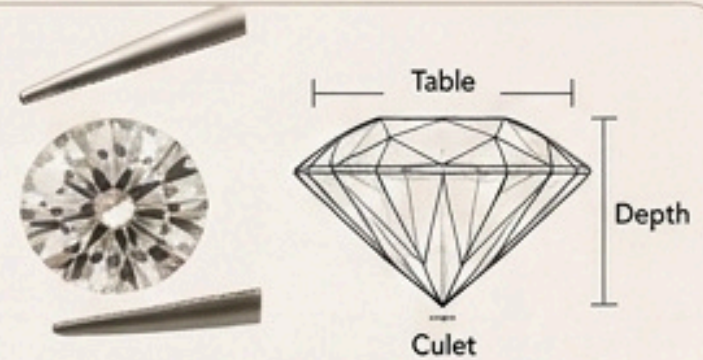

CUT

Precision in every facet and proportion.

Our gemologists examine the symmetry, proportions and polish of each diamond to ensure optimal brilliance, fire and scintillation.

- Table, depth and angles measured with advanced tools
- Symmetry and alignment checked for perfect balance
- Polish and finish inspected for a mirror-like shine
- Only diamonds that maximize beauty make the cut

2

COLOR

Consistent with graded excellence.

We verify that each diamond's color meets the exact grade stated — from icy D to warm tones — using controlled lighting and industry standards.

- Graded under master lighting conditions
- Compared against GIA master color stones
- Checked for any color zoning or unevenness
- Ensures a pure, consistent and beautiful appearance

3

CLARITY

Eye-clean and flawless to the standard.

Every diamond is examined under 10x magnification to conform clarity grade and ensure it is eye-clean.

- Inclusions mapped and graded with precision
- Evaluated under 10x magnification
- Eye cleanliness confirmed from the top view
- Only clarity that looks flawless to the eye is accepted

4

GIRDLE THICKNESS

Measured for durability and balance.

The girdle — the outer edge of the diamond — is measured to ensure it's neither too thin (risk of chipping) nor too thick (added weight without beauty).

- Girdle thickness measured with precision instruments
- Ensures structural integrity and long-term durability
- Balanced for beauty, strength and value
- Protects your investment for generations

5

LIGHT PERFORMANCE

Exceptional brilliance, fire and scintillation.

We evaluate how each diamond interacts with light — the ultimate measure of its beauty.

- Brilliance (white light return tested)
- Fire (colorful flashes) evaluated
- Scintillation (sparkle) observed in motion
- Only diamonds with breathtaking light performance are chosen
